

For maximum grip with optimal gliding properties.

2) Roughen up

Use sand paper to roughen the kick zone and remove dust with Base Tex.

2) Apply Base Green

Base Green serves as an unbeatable base for all grip waxes. It dramatically increases the adhesion.

3) Iron in

Iron in the base wax and allow the ski to cool down well in the cold.

5) Cork

Cork the base lightly with the Plasto cork.

5) Apply the wax and cork

Apply the desired dry wax in 3-4 thin layers. Cork each layer
